

15-Key Vandal-Proof Metallic Keyboard

The Keetronics 15-Key Vandal-Proof Metallic Keyboard is designed for applications requiring a durable and compact input device. Featuring 15 metallic keys with vandal-proof construction, it is suitable for environments where resistance to physical handling and demanding operating conditions is important.

The keyboard is PC-compatible and supports USB output for straightforward system connectivity. Its tabletop configuration allows convenient placement and operation across various control and equipment interfaces.

Technical Specifications

Keyboard Type	Short Travel Keyboard
Number of Keys	88 Keys
