84-Key Capacitive Keyboard with Integrated Touch Mouse

The Keetronics 84-Key Capacitive Keyboard is a PC-compatible keyboard designed for reliable data entry and cursor control. Featuring 84 capacitive keys and an integrated touch mouse, it combines keyboard and mouse functionality in a single input device.

Its dome-free capacitive technology eliminates mechanical domes, minimising mechanical wear and tear and supporting extended operational life. The keyboard offers single-cable connectivity for simplified system integration and is available with an enclosure option for convenient installation.

Technical Specifications

Key Technology	Capacitive
Number of Keys	84 Keys
Compatibility	PC-Compatible
Integrated Pointing Device	Touch Mouse
Mechanical Domes	Not Required
Connectivity	Single Cable
Connectivity	Available

Key Highlights

- 84-Key Capacitive Design: Dome-free capacitive key technology for keyboard operation.
- Integrated Touch Mouse: Combines keyboard input and cursor control in one device.
- Extended Operational Life: No mechanical domes, minimising wear and tear.
- Single-Cable Connectivity: Simplified connection with an enclosure option available.
