

Quartz (2M) 4 Switch + Master Smart WiFi Touch Panel

Key Highlight

- 4 Switch + Master panel with 16A load handling capacity
- WiFi-enabled mobile app control with RF remote support
- Proximity sensor with up to 1-foot wake-up range

Production Information

The Quartz (2M) 4 Switch + Master Smart WiFi Touch Panel is a premium glass-based smart switch solution designed for modern residential and commercial interiors. Built with a clean round glass finish and compatible with a 2M fitment box, it combines elegant design with reliable electrical performance.

This smart switch panel provides four independent outputs along with a master control, each rated at 230V AC with a 16 Amp contact rating. It supports LED lamps and incandescent loads up to 16A, making it suitable for a wide range of lighting and electrical applications.

Equipped with a proximity sensor, the panel offers a proxy wake-up feature that activates the touch interface when a hand approaches within a range of up to 1 foot. This ensures ease of use in low-light conditions while enhancing user convenience.

The Quartz (2M) panel supports 2.4 GHz WiFi connectivity for mobile app-based control, allowing users to manage lighting and connected loads remotely. It also works with RF remote control for in-room wireless operation. Additionally, the switch is compatible with Google Assistant and Amazon Alexa for voice-based control, enabling seamless smart home integration.

Designed in the Quartz style, the panel delivers smooth and responsive touch functionality for everyday use. Custom glass printing options and RF remote are available as optional add-ons based on project requirements

Technical Specifications

Number of Outputs	4 Switches + Master Control
Output Contact Rating	230V AC, 16 Amp
Load Compatibility	LED Lamp, Incandescent Load up to 16A
Fitment Type	2M Fitment Box
Panel Finish	Round Glass
Proximity Sensor	Yes (Proxy Wake-up)
Wake-Up Range	Up to 1 Foot
WiFi Connectivity	2.4 GHz (Mobile App Based Control)
Remote Control	RF Remote Supported
Voice Compatibility	Google Assistant & Amazon Alexa
Touch Interface	Capacitive Smooth Touch Control
Application Area	Home and Room Lighting Control
