

Black Overlay Illuminated Keyboard with 50 mm Trackball

The Black Overlay Illuminated Keyboard is a PC-compatible industrial keyboard designed for applications requiring illuminated controls and integrated pointing functionality. The keyboard features a black overlay with illumination and brightness control, providing adjustable illumination for operator use.

A large 50 mm trackball is integrated into the keyboard for ease of operation. The trackball has a removable ball feature for convenient handling and maintenance. The keyboard also features a spill-proof design and an IP54-compliant construction for use in demanding industrial environments.

The keyboard is specified for EMI/EMC compliance to 461-E/F, making it suitable for applications where electromagnetic compatibility requirements are important. The supplied product image shows a full-size keyboard layout with function keys, navigation keys, numeric keypad, status indicators, dedicated brightness controls and an integrated trackball.

Key Features :

- Illuminated black overlay keyboard with integrated brightness control for adjustable operator visibility.
- 50 mm large trackball with a removable ball feature for convenient operation and maintenance.
- PC-compatible, spill-proof design with an IP54-compliant construction for industrial applications.
- EMI/EMC 461-E/F compliant design with integrated keyboard, navigation, numeric keypad and trackball controls.

Technical Specifications :

Product Type	Illuminated Industrial Keyboard
Keyboard Type	PC Compatible
Illumination	Illuminated
Brightness Control	Yes
Trackball	50 mm Big-Size Trackball
Trackball Feature	Removable Ball
Keyboard Design	Spill-Proof
Ingress Protection	Ip54 Compliant
EMI/EMC	461-E/F Compliant
Pointing Device	Integrated Trackball
Layout	Full Keyboard with Function, Navigation & Numeric Key Sections
Status Indicators	Num Lock, Power and Caps Lock
Additional Controls	Dedicated Brightness Control Keys
