Metallic Vandalproof Keyboard with Touch Mouse & 50 mm Trackball

The ECIL Metallic Vandalproof Keyboard is a rugged operator interface designed for applications requiring durable construction and integrated pointing controls. It features an SS304 grade metal front plate with a customized colour finish.

The keyboard combines a touch mouse with a 50 mm diameter trackball, providing two integrated pointing options for operator interaction. It is PC compatible and designed for demanding industrial applications.

The keyboard provides IP54 protection and is specified as EMI/EMC 461-E/F compliant, supporting applications where environmental protection and electromagnetic compatibility are required.

Key Features :

- Ss304 grade metal front plate with customized colour options for a durable vandalproof operator interface.
- Dual pointing functionality with an integrated touch mouse and 50 mm diameter trackball.
- PC-compatible design for integration with industrial computer-based control systems.
- Ip54 protection and 461-E/F EMI/EMC compliance for demanding industrial applications.

Technical Specifications :

Front Plate Material	Ss304 Grade Metal
Front Plate Finish	Customized Colour
Pointing Devices	Touch Mouse + Trackball
Trackball Diameter	50 mm
Keyboard Compatibility	PC Compatible
Ingress Protection	Ip54
EMI/EMC	461-E/F Compliant
Construction	Vandalproof Metallic Design
