

Rugged Industrial Keyboard Solutions For Baggage X-Ray Scanner Systems

Reliable, customizable solutions for airport security and baggage scanning systems.

- ✈ 32+ Years of experience
- ✈ State-of-the-art manufacturing facility
- ✈ Most trusted by reputed OEM's
- ✈ Technically qualified & experienced employees

Keetronics provides high-performance, rugged keyboards designed specifically for baggage scanning machines, engineered for 24/7 use in demanding airport environments. Built for consistent performance, reliability, and seamless integration, our solutions are trusted to keep security operations running smoothly.

As part of Keetronics (India) Pvt. Ltd., a proud 'Made in India' manufacturer under the Prime Minister's Make in India initiative, Keetronics brings over 32+ years of expertise in designing, developing, and manufacturing advanced input devices.

The Demands of Airport Operations

Airports run 24/7 and require durable equipment. Standard keyboards often fail in these high-pressure environments, leading to operational downtime, increased maintenance costs, and compromised security.

Keetronics: Built for Reliability

We provide actual baggage scanner keyboard solutions that help security teams work efficiently and without interruption. Our rugged, customizable keyboards are designed to deliver consistent performance and long-term reliability, even under continuous use.

Key Features...

Custom Branding & Logo Printing

Match your brand identity for OEM and airport deployments.

Tactile & Long Travel Keys

Improves accuracy and reduces operator fatigue.

IP-rated Protection

Dust and water resistance for durability in harsh conditions.

Extended Life Switches

Ensures long operational life, even in 24/7 environments.

Sustainability

Built with eco-friendly, RoHS-compliant materials.

Two-Year Warranty

Coverage for manufacturing defects for peace of mind.

Better Aesthetics & Ergonomics

Designed for comfort and visual appeal.

Backlit / Night Vision Support

Ideal for low-light or night-shift environments.

EMI / RFI Shielding

Protects against electromagnetic interference for secure performance.

Touch + Key Hybrid Panels

Combine touch control and physical keys for flexibility.

Custom Connectors & Interfaces

USB, PS/2, RS232, or custom options for seamless integration.

Partner with Us for Reliable Security Operations

Let's discuss how Keetronics can provide the perfect keyboard solution for your baggage scanning systems.

INARI Keyboard – MIL-Grade (Non-IP) with Integrated Touchpad

Silicon Based Keyboard with Integrated Touchpad
