

Wireless MIDI Controller For Acoustic Guitar

Play, Produce And Perform From Your Guitar Itself

This controller lets guitar players tap into digital music production without changing the way they play. It sits on the guitar surface, attaches in seconds and gives instant access to instruments, loops and effects. Whether you're just starting out or you're an experienced performer, it adapts to your style.

You can trigger loops, play percussion, control bass lines or add effects while you strum. It also works seamlessly with major DAWs like Ableton Live and ProTools, so your creative options are wide open. The ultra-thin design uses gold-plated pressure-sensitive pads for accurate response and expressive play. The layout has been refined through extensive testing with guitarists, resulting in an intuitive setup that feels natural during live performance or studio work.

Specifications :

- Wireless MIDI connectivity
- Ultra-thin form factor (few millimeters thick)
- Pressure-sensitive gold-plated pad contacts
- Multiple configurable trigger zones
- Supports a wide range of MIDI assignments
- Adhesive backing for tool-free mounting
- Compatible with major DAWs on Mac and Windows
- Rechargeable internal battery (if applicable-add exact spec if known)

Key Features :

- Wireless MIDI control directly from your acoustic guitar
- Access to instruments, loops, effects and samples
- Gold-plated pressure-sensitive pads for expressive playing
- Ultra-thin, lightweight construction
- Intuitive, guitarist-tested control layout
- Fully compatible with leading DAWs (Ableton, ProTools and more)
- Non-permanent attachment with gentle adhesive
- Easy removal without residue
- Designed for both beginners and advanced performers

Advantages :

- Turns an acoustic guitar into a full performance workstation
- No cables, screws or modifications required
- Lets beginners trigger loops with ease
- Gives advanced players full creative control on stage
- Highly expressive thanks to pressure-sensitive pads
- Portable, durable and stage-ready
- Expands musical possibilities without changing your natural playing style

Application :

- Live looping and solo performance
- Acoustic-percussive hybrid playing
- Studio recording and music production
- Adding effects while strumming
- Triggering drums, bass, synths or samples on stage
- Improvisation and jam sessions
