

Braille Keyboard Stickers & Overlays

Key Highlight

- Clear embossed Braille symbols for tactile identification
- Easy peel-and-apply adhesive with residue-free removal
- Non-slip surface for stable and accurate typing
- Cost-effective retrofit solution for accessible computing

Production Information

Keetronics PC-Compatible Braille Keyboard Stickers provide a simple and cost-effective solution to make standard keyboards accessible for visually impaired users. Designed with precision Braille embossing, these stickers allow users to identify letters, numbers, and frequently used keys such as Shift, Enter, and Space through touch. Enables Users To Interact With Digital Systems Confidently And Independently.

Braille stickers work by transforming an existing keyboard into a Braille-compatible interface without requiring hardware replacement. This retrofit approach makes accessibility more affordable and scalable across organizations and institutions. Widely used in homes, educational institutions, and public workspaces, Keetronics Braille stickers help promote digital literacy, independence, and equal access to technology

Technical Specifications

Compatibility	Standard PC, Laptop Keyboards and Keypad Overlays
