

Remote switch – 4 Key Wireless RF Smart Switch

Key Highlight

- 4-key wireless smart switch with RF control
- Battery-free kinetic energy technology
- Smart scenes and voice assistant support

Production Information

The Garnet Travel Switch – 4 Key model provides a balanced smart control solution for homes and commercial environments. Designed to act as a portable parallel switchboard, it allows users to control electrical loads wirelessly from anywhere within range.

Powered by kinetic energy technology, the switch generates its own energy with each press, removing the need for batteries or wiring. With a 30-meter operating range, it delivers reliable RF communication and instant response without delay. Garnet supports voice activation via Amazon Alexa and allows scene control options for improved convenience. It includes ON/OFF indicators, remote key assignment functionality, and configurable last status recovery after power failure.

Its slim and portable design makes it easy to place anywhere, while the optional wall mount holder provides additional flexibility. It is engineered for direct 1:1 replacement of existing switchboards without structural modifications.

Features

- Industrial Grade
- Custom Layout
- High Quality
- Made In India

Technical Specifications

Number of Keys	6
Control Technology	RF Wireless
Operating Range	Up to 30 meters (open space)
Load Control	Controls multiple electrical loads / zones
Power Failure Memory	User configurable last status recovery
Installation Type	1:1 replacement for existing switchboards
Mounting Option	Portable with optional wall-mount holder
Response Time	Instant, zero lag
