

Remote switch – 3 Key Wireless RF Smart Switch

Key Highlight

- Compact 3-key wireless smart control
- Self-powered kinetic operation without batteries
- Easy retrofit installation without rewiring

Production Information

The Beryl Travel Switch – 3 Key model offers compact and efficient wireless control for modern homes and commercial spaces. Designed as a portable parallel switchboard, it enables control of lighting and electrical loads from any convenient location.

Using kinetic energy technology, the switch powers itself through button press action, eliminating the need for batteries or wiring. With RF-based control and a range of up to 30 meters, it ensures reliable and responsive operation. Beryl supports voice activation via Amazon Alexa and allows users to manage ON/OFF status with clear indicators. It also features last status recovery after power restoration and remote key assignment functionality.

This model is perfect for applications where fewer controlled zones are required, while still maintaining smart control capabilities and simple 1:1 replacement compatibility with existing switchboards.

Features

- Industrial Grade
- Custom Layout
- High Quality
- Made In India

Technical Specifications

Number of Keys	6
Control Technology	RF Wireless
Operating Range	Up to 30 meters (open space)
Load Control	Controls multiple electrical loads / zones
Power Failure Memory	Configurable last status recovery
Installation Type	1:1 replacement for existing switchboards
Mounting Option	Portable with optional wall-mount holder
Response Time	Instant, zero lag
